Full-Stack Software Developer with 7 years of experience in the fintech industry, specializing in payment systems. Expertise in JavaScript and Java, front-end and back-end development, API integration, and optimization of transactional systems and banking APIs. English: C1 (IELTS).

Professional Experience

Full-Stack Software Developer

Nanopay - P2P payment platform, Toronto, Canada

Dec 2019 – Jan 2026

- Designed and implemented an automated reconciliation system for 100–500 daily transactions between the platform and partner banks, reducing manual verification by over 90% and significantly improving the reliability of the reconciliation process.
- Developed and deployed a resilient real-time transaction limit calculation engine that accounts for bank availability, user-specific constraints, and time-based windows.
- Automated the identity verification process during transactions by integrating KYC systems, payment systems, and backend services, enabling real-time automated validation in under 1 second.
- Redesigned the event processing system by replacing a high-frequency API polling mechanism (1 request/sec/transaction) with a webhook-based architecture, reducing redundant API calls by 90% and optimizing backend service load.

Data Scientist (Co-op) / Esentire (Student Research / Conestoga College)

Esentire and Conestoga College, Waterloo, ON

Apr 2019 - Aug 2019

- Contributed to the development of neural networks for classification and recognition tasks using Python and TensorFlow.
- Worked closely with designers to implement the frontend representation of the obtained results.
- Participated in code reviews and team meetings to discuss project progress.

Skills

- **Programming Languages:** JavaScript, Java, Python, Node.js
- **Front-end / Web Technologies:** React, CSS3, HTML5
- **Back-end & API:** REST, Webhooks, JWT, Next.js
- **Databases:** SQL, NoSQL
- **Tools:** GitHub, Linux, Jira, Postman
- **Methodologies:** Agile, Scrum
- **CELP:** Average score: 9.5, 10/03/2021
- **IELTS:** English proficiency level: C1, 20/04/2018

Projects

Foree Remittance

January 2024 – January 2026

Foree Remittance is an international money transfer application to Pakistan, developed at Nanopay. I developed key front-end and back-end components, including user onboarding, transaction processing, and the email notification system. The platform had more than **2,000 active users**, processed over **CAD 10M in transfers per week**, and enabled the majority of transfers to be completed within **1–2 minutes**.

Education

Master of Informatics

[Vilnius University](#), Vilnius, Lithuania

2022 - 2024

- Thesis: Multi-prover Ethereum Layer 2 Rollups.

[Conestoga College](#), Waterloo, Canada

2018 - 2019

- Computer Applications Development Post-grad Co-op Program.

Bachelor of Computer Science

[National Technical University of Ukraine "Igor Sikorsky Kyiv Polytechnic Institute"](#), Kyiv, Ukraine

2014 - 2018

- Thesis: "Adaptive means of information protection based on the device of neural networks."

Languages

- **English:** Fluent
- **Ukrainian:** Native
- **Russian:** Native
- **France:** B1(in progress)
